

# Lab Safety Initiative Update

July 2018

**Greetings!** The [Lab Safety Initiative](#) has been completed. This two-year initiative was conducted with a pilot group of about 90 labs, encompassing 33 scientific departments. The third and final round of surveys of the pilot group were completed this past Spring Quarter, and we saw great improvements in the group's Lab Safety Performance Ratings. Tools and resources developed for the initiative have been shared with the whole campus, and the average safety performance rating for all UW labs has also seen an increase over the last couple of years.

## Current Lab Safety Performance Rating Stats

UW average: **85**  
 UW Target: **85**  
 LSI pilot group average: **81**
